

# Translate5 5.0.9 - 2020-09-16

## Important Notes:

API change: fix in the API of InstantTranslate file translations - see [TRANSLATE-2195](#)

## Added

[TRANSLATE-1050](#): Save user customization of editor

The user may now change the visible columns and column positions and widths of the segment grid. This customizations are restored on next login.

[TRANSLATE-2071](#): VisualReview: XML with "What you see is what you get" via XSL transformation

A XML with a XSLT can be imported into translate5. The XML is then converted into viewable content in VisualReview.

[TRANSLATE-2111](#): Make pop-up about "Reference files available" and "Do you really want to finish" pop-up configurable

For both pop ups it is now configurable if they should be used and shown in the application.

[TRANSLATE-1793](#): search and replace: keep last search field or preset by workflow step.

The last searched field and content is saved and remains in the search window when it was closed.

## Changed

[TRANSLATE-1617](#): Renaming of buttons on leaving a task

The label of the leave Button was changed.

[TRANSLATE-2180](#): Enhance displayed text for length restrictions in the editor

The display text of the segment length restriction was changed.

[TRANSLATE-2186](#): Implement close window button for editor only usage

To show that Button set `runtimeOptions.editor.toolbar.hideCloseButton` to 0. This button can only be used if translate5 was opened via JS window.open call.

[TRANSLATE-2193](#): Remove "log out" button in editor

The user has first to leave the task before he can log out.

## Bugfixes

[TRANSLATE-630](#): Enhance, when text filters of columns are send

When using a textfilter in a grid in the frontend, the user has to type very fast since the filters were sent really fast to the server. This is changed now.

[TRANSLATE-1877](#): Missing additional content and filename of affected file in E1069 error message

Error E1069 shows now also the filename and the affected characters.

[TRANSLATE-2010](#): Change tooltip of tasks locked because of excel export

The content of the tooltip was improved.

[TRANSLATE-2014](#): Enhance "No results found" message in InstantTranslate

Enhance "No results found" message in InstantTranslate

[TRANSLATE-2156](#): Remove "Choose automatically" option from drop-down, that chooses source or target for connecting the layout with

Since this was confusing users the option was removed and source is the new default

[TRANSLATE-2195](#): InstantTranslate filepretranslation API has a wrong parameter name

The parameter was 0 instead as documented in confluence.

[TRANSLATE-2215](#): VisualReview JS Error: me.down(...) is null

Error happend in conjunction with the usage of the action buttons in Visual Review.

[TRANSLATE-1031](#): Currently edited column in row editor is not aligned right

When scrolling horizontally in the segment grid, this could lead to positioning problems of the segment editor.
