

TextShuttle

Description

This plugin connects the TextShuttle machine translation engine to translate5.

To use LanguageResources in translate5, refer to the guide on [Basic usage - LanguageResources](#).

This resource supports batch pre-translation, with the current value set to 100 segments.

Category	LanguageResource
Purpose	Integrate TextShuttle as LanguageResource.
Bootstrap Class	editor_Plugins_TextShuttle_Init
Type	Plug-in (only available for companies with a Support- and Development contract)
