

Plug-in overview

Most new features in translate5 can and should be written as plug-ins. This space gives you an overview of existing plug-ins. For information on how to write a plug-in, please visit the [translate5 architecture documentation](#).

Every user is welcomed to add a plug-in to this page.

Available Translate5 plugins
• AcrossHotfolder • ArchiveTaskBeforeDelete • DeepL • DeleteUserAssociations • GlobalesePreTranslation • GroupShare • InstantTranslate • IpAuthentication • LockSegmentsBasedOnConfig • ManualStatusCheck • Match-analysis • MatchResource [Deprecated] • ModelFront • MT-ComparEval • NEC-TM • NoMissingTargetTerminology • Okapi • OpenAI • PangeaMT • SegmentStatistics • SpellCheck • TermImport • TermTagger • TextShuttle • TildeMT • Transit
