LanguageResources: Taskassoc

⚠ If the API changes in an incompatible manner this is listed explicitly in the "important release notes" section of each releases changelog.

Provides access to the associations between tasks and language resources.

URL:	/editor/languageresourcetaskassoc/[ID]
Available Methods:	GET / POST / DELETE
Specialities:	Datasets can not be edited, only deleted and created.

Resource Layout

Name	Type	Info
id	integer	(GET,DELETE) auto incremented
languageResourceId	integer	(POST) The language resource which should be assigned to the task. (table name LEK_languageresources field name 'id')
taskGuid	string	(POST) Unique task guid identifier. (table name LEK_task field name taskGuid)
segmentsUpdateable	integer	(POST) Segments will be updated in the language resources. (default is 0)

Post request example

```
{
        data:{
            "languageResourceId":1,
                 "taskGuid":"{341d3dab-8c0b-4469-a8a8-30e9ddb81a26}",
                "segmentsUpdateable":0
        }
}
```
