Task User Associations

Provides the associations between users and tasks.

URL:	/editor/taskuserassoc/[ID]
Available Methods:	GET / POST / PUT / DELETE
Specialities:	

Resource Layout

Name	Type	Info
id	int	GET only
entityVersion	int	PUT / POST only, optional, is compared against the tasks entity version
taskGuid	string	
userGuid	string	
login	string	GET only, set by server
surName	string	GET only, set by server
firstName	string	GET only, set by server
state	string	Valid values depend on the used workflow, for the default see the API usage in basic workflow description.
~~role~~	string	DEPRECATED use workflowStepName instead!
workflowStepName	string	Valid values depend on the used workflow, for the default see the API usage in basic workflow description.
usedState	string	GET only, set by server
usedInternalSessionUniqId	string	GET only, set by server
isPmOverride	integer	GET only, set by server
staticAuthHash	string	GET only, set by server; Needed for single click authentication. Only readable for users with role "api".
deadlineDate	date	The date when the user should finish the assigned job. For each workflow and workflow step, can be defined how many days (excluding week-ends) the deadline should be in the future based on task order date. ex: In this config *runtimeOptions.workflow.default.translation.defaultDeadlineDate*, you can define the default deadline date for default workflow and translation step To use the defaultDeadline date config, set the deadlineDate with value "**default**" on post request.
assignmentDate	date	The date when the user is assigned to the job. (if the date is not set, it will be current date)
finishedDate	date	The date when the user finished the assigned job.
