Tasks: Meta data and KPI

If the API changes in an incompatible manner this is listed explicitly in the "important release notes" section of each releases changelog.

Key Performance Indicators (KPI)

URL:	/editor/task/kpi
Available Methods:	POST
Specialities:	• params (form-data): filter (= taskGrid-filtering) • returns JSON with averageProcessingTime and excelExportUsage

Excel with Meta-data and KPI

URL:	/editor/task/kpi?format=xlsx&filter=[FILTER]&visibleColumns=[VISIBLECOLUMNS]
Specialities:	• format: xlsx • filter = taskGrid-filtering • visibleColumns = visible columns in taskGrid • returns Excel-file with two sheets: (1) taskGrid according to filters and visible columns (2) the filters that have been applied and the resulting KPI
