

# Discussion progress Linux version

## What OpenTM2 plug-ins will we need

- OpenTM2Starter: I'm not sure, if you need that for starting the OtmMemoryService. I would guess, it is only needed for starting the GUI app
- OtmAutoVerUp: 99% sure NOT needed
- dictionary: 99% sure NOT needed
- document: could be needed for analysis / matches. Not sure. Probability 30% needed.
- linguistic: could be needed for analysis / matches. Not sure. Probability needed 50%
- /markup/UserMarkupTablePlugin/: 100% sure Not needed
- /markup/OtmMarkupTablePlugin/: It depends:
  - OTMXMLF: Needed for sure for saving and querying segment, e. g. for [http://opentm2/translationmemory/\[TM\\_Name\]/entry/](http://opentm2/translationmemory/[TM_Name]/entry/)
  - OTMXML: Might be needed for TMX import with [http://opentm2/translationmemory/\[TM\\_Name\]/import](http://opentm2/translationmemory/[TM_Name]/import)
  - common: 90% sure, it is needed
  - Quite sure (98%) the rest here is NOT needed
- morph/OtmMorphICUPlugin: 100% sure NOT needed
- spell/OtmSpellHSPlugin: 100% sure NOT needed
- tools: 99% sure NOT needed
