

translate5 5.5.2 - 2021-10-11

Important Notes:

This release contains a major bugfix for instances having disabled sub languages in the TermPortal.

Changed

TRANSLATE-2637: Warn regarding merging terms

Warning message will be shown when using merge terms functionality in term collection import/re-import

TRANSLATE-2630: Add language resource name to language resource pop-up - same for projects

Improves info messages and windows titles in language resources, project and task overview.

Bugfixes

TRANSLATE-2661: Creating empty OpenTM2 language resources does not work anymore

Creating empty OpenTM2 language resources does not work anymore, this is fixed.

TRANSLATE-2597: Set resource usage log lifetime by default to 30 days

This will set the default lifetime days for resources usage log configuration to 30 days when there is no value set.

TRANSLATE-2528: Instant-translate and Term-portal route after login

Fixed problems accessing TermPortal / InstantTranslate with external URLs.
